CREATIVE LAB AND LECTURE 5:

Software and plugins to download and install in advance - if you are unsure how or where to install an item, we can also do it together in the group. This is to provide you with additional opportunity to read a bit about the tools. Please note, **you don't need them all**, instead you could select one DAW or simply one editor such as Adobe Audition, or Max/MSP. Then you need a working set of plugins: if you are doing multi-channel I recommend the Ambix plus MCFX convolver plus IEM suite. If you are using Max/MSP then also get SPAT library. If you are working in stereo, I recommend Ableton Live plus their native Convolution Reverb Pro item or any of the other combinations.

Ableton/Max4Live:

Download Convolution Reverb

https://www.ableton.com/en/packs/convolution-reverb/#?item_type=max_for_live

Envelop SF:

<https://envelop.us/page/software>

Cycling74 - Max/MSP and/or Max4Live

Download SPAT external library for Max/MSP

<https://forum.ircam.fr/projects/detail/spat/#project-versions-anchor>

Adobe Audition

Reaper:

https://www.reaper.fm/download.php?from_reaper=1

Ambix Plugins:

<http://www.matthiaskronlachner.com>

MCFX Convolver:
